SERICULTURAL  
COMMISSION

UNITED NATIONS REG. NO. 10418

The 6th Asia-Pacific  
Congress of Sericulture and  
Insect Biotechnology

**APSERI-2019**

2-4 March 2019 • Mysore, India

## WELCOME TO MYSORE, INDIA AND THE APSERI-2019

The International Sericultural Commission (ISC), Bangalore, India take great pleasure in inviting you to the prestigious, VI Asia Pacific Congress of Sericulture and Insect Biotechnology (APSERI-2019) being held at Mysore, the City of Palaces, from 2-4 March 2019.

## APSERI-2019

The Asia Pacific Congress of Sericulture and Insect Biotechnology is an international forum committed exclusively for the sericulture science that provides access to progress made in science and technology, current knowledge of the field, and the future opportunities for silkworm and silk.

It offers an exclusive opportunity for international scientists, universities, faculty & students of Institutions of research in host plants, silkworms, post-cocoon technology, silk processing, promotion, conservation, bio-technology, frontier areas of research, etc., to interact, share and exchange the most recent advancements in their fields.

Presentation of a large number of scientific papers, apart from several poster presentations in various fields is expected to lead up to the formation and dissemination of current and new scientific and adaptive knowledge in the field, including honing up the base-line skills for the core participants.

In effect, the Proceedings of the APSERI-2019 would bring together in a single, free, open, equitable access-resource, the collective knowledge and erudition of the international silk community, displayed in the presence of an insightful global audience, which can be usefully translated into strategic tools for the advancement of silkworm and silk and its enormous scope and applications in many countries.

*Go for Silk  
Go to Nature...*

The silk industry has been considered as a livelihood option for the rural population, especially the women and other weaker sections of the society in many countries. With the increasing awareness on natural products, the silk has been preferred as an ideal textile product for many consumers in the world. Further, there is greater scope for diversifying the products with the current day requirements. There is also enormous scope for using silkworm and silk in frontier areas like industrial, pharmaceutical and nutritional

sectors. Substantial research and developmental activities on these fields are being undertaken in different R&D laboratories across the globe. It is critically important to aggregate and disseminate these innovations and developments among the global silk fraternity. Keeping this important factor in mind, the Organizer has decided to adopt the Congress theme as "Go for Silk, Go to Nature". The Congress will have exclusive lead papers concerning this subject for detailed deliberation.

## The Organizer

International Sericultural Commission (ISC), established in 1960, which had its headquarters at Lyon, France, is now functioning from Bangalore, India from 1<sup>st</sup> January, 2013. ISC is the only inter-governmental organization engaged in the development of sericulture and industry in the world. The twenty Member Countries of ISC are Afghanistan, Bangladesh, DPR Korea, Brazil, Egypt, France, Greece, Ghana, India, Indonesia, Iran, Japan, Kenya, Madagascar, Nepal, Romania, Syria, Thailand, Tunisia and Uzbekistan. For more details about ISC, please visit <http://inserco.org>

**Official Language** English is the official language of the APSERI-2019.

**The Venue:**  
The venue of the Conference is Hotel Southern Star, Mysore, India.

## APSERI-2019 comprises 6 Sections

Current status of sericulture and insect biotechnology in participating countries. Open to invited speakers only.

All aspects and areas concerning Mulberry like; cultivation, breeding, pathology, physiology, agronomy, soil science, etc.

Rearing, feeding, pathology, physiology, and breeding aspects of Bombyx mori (mulberry silkworm)

Rearing, feeding, pathology, breeding, host-plants, etc. related to wild silkworms.

Silkworm as a biological model, genetics, physiology, biochemistry, genetic-engineering, molecular biology, developmental biology, and genomics.

Reeling, cocoon preservation, silk quality, gradation, weaving, processing, product diversification, by-product utilization and bio-materials.

# Your Contributions

Interested persons may please send the abstract of the scientific papers by soft copy (via e-mail) directly to the Congress Secretariat by e-mail : [apseri2019@gmail.com](mailto:apseri2019@gmail.com)

An abstract should provide the context or background for the study and state the purpose of the research, scope of the experiment, major findings and principle conclusions. References in the abstract must be cited in full as like; “Sampaio et.al. 2008 J. Biosci.Bioeng.,105;305-312” . The abstract should be written in the past tense as a single paragraph not exceeding 250 words. The abstract should be prepared and shall be reproduced directly. Authors will, therefore, have the full responsibility for correct design and contents. Please note the following information;

<b>Paper</b>	A4
<b>Title Style</b>	Bold Times New Roman with 14 font size
<b>Authors and Institution</b>	Italic Times New Roman with 12 font size
<b>Text</b>	Times New Roman with 12 font size and written in one paragraph
<b>Key Words</b>	A list of three to six key words for indexing must be included in the abstract

A sample Abstract form can be referred elsewhere in the Brochure. The full paper must be submitted at the Conference desk on 2<sup>nd</sup> March 2019.

Last date for submission of abstracts together with Registration is 31<sup>st</sup> December 2018.

# Selection Process for Contributions

A Scientific Committee comprising eminent persons in the respective fields would select the contributions based on merit, contemporaneous issue selection, contextual appropriateness, equitable distributions of contributions to various Themes of different Sections, country-wise parity, and the time-slots available, etc. The Committee would also segregate the papers for oral and poster presentations.

## 01 Oral Presentations

Duration of each presentation will be 15 min ( 12 minute presentation followed by 3 minute question and answer session). PowerPoint package compliant to Windows 10 would be available for PPT.

## 02 Poster Presentation

Poster boards of 160 cm x 150 cm and materials for fastening posters shall be provided. The poster size should be within 120cm (height) x 100 cm (width). The poster should contain the title which must be the same as that of the abstract, the name(s) of author (s) others affiliation and address(es).

## 03 Publication of Book-of Abstracts and Proceedings

The organizers reserve the right to edit and publish the Book-of-Abstracts of contributions received, and the Proceedings of the APSERI-2019. The full papers shall also be considered for publishing in the scientific journal of ISC; Sericologia. The Proceedings would include contributions selected for oral, and poster presentations, as well as other select contributions.

## MYSORE the host city

Mysore (or Mysuru), a city in India's southwestern Karnataka state, was the capital of the Kingdom of Mysore from 1399 to 1947. Mysuru, is the third largest and second most populated city of Karnataka and is 150 kms from Bangalore. The rich cultural environment of Mysore has earned it the moniker of Cultural Capital of Karnataka. In its center is opulent Mysore Palace, the seat of the former ruling Wodeyar dynasty. There are some notable heritage structures in Mysore like the famous Mysore Palace and the Jaganmohana Palace. Other significant tourist spots in Mysore include Somanthapura, Karanji Lake & Park, Chamundi Hill, Brindavan Garden and Rail Museum. Mysore is also famed for its exceptional quality of Mysore Silk and a unique tradition of painting known as Mysore Painting. This city offers quite a few mouthwatering delicacies like the Mysore Pak and Mysore Masala Dosa.

## WEATHER

March is the beginning of summer in this part of India. Summers in Mysore are warm with the temperature varying between 22° C and 35° C. The days are bright and sunny and the evenings are quite cool and pleasant. So you can easily carry on with all tourist activities. Summer wear is recommended.

## CURRENCY AND BANKING

The organizers of APSER-2019 would arrange a Foreign Exchange Desk at the Venue of the Congress for your convenience. Foreign currency exchange service is also available at Bangalore Airport and the hotels. Major credit/debit cards are widely accepted at shops, hotels, airlines, and many business centers.

## VISA

All foreign delegates are requested to apply for the Indian Conference Visa through Online by application link <https://indianvisaonline.gov.in/visa/index.html#>. The duly signed physical copy of the application form submitted successfully, need to be submitted at the concerned Indian Visa Application Center (IVAC) or directly to Indian Mission/ Post, on the scheduled date of interview along with the requisite supporting documents.

Online filing of Visa Application should be done at least 30 days in advance. In case of delegates from Afghanistan, Iraq, Pakistan, Foreigners of Pakistani origin and Stateless persons, Visa application need to be filed 60 days in advance.

## TRAVEL

The nearest major airport to Mysore is the Bangalore International Airport, which is about 170 kilometers away. Bangalore is very well-connected to all major cities of the world. It takes about three hours by road to reach Mysore from Bangalore. All foreign delegates shall be received at Bangalore International Airport and taken to Mysore by car/bus.

Indian delegates may make their own arrangements for travelling to Mysore either by taking AC Bus from the Airport terminal, by train from Bangalore Railway Station or by Bus from Bangalore Bus Station. Convenient AC City buses are available from Airport to City Bus/train Stations.

## POST CONFERENCE TOURS

An optional tour as detailed in the next page shall be arranged for interested Delegates, on payment of actual cost.

# Programme

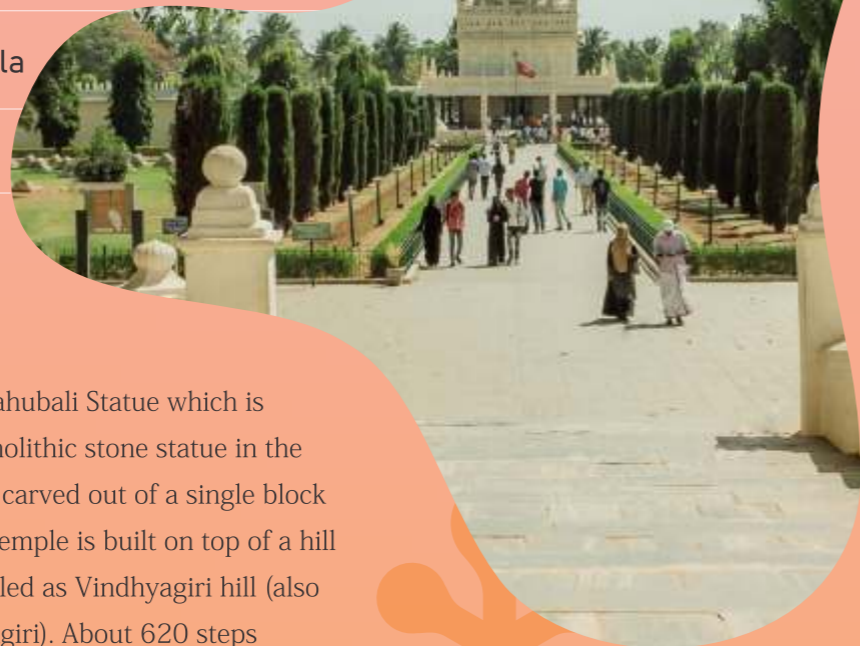

08 00 hrs Leave to Srirangapatna and visit the Summer Palace of Tippu Sultan, Triveny, Temple and other monuments

11 00 hrs Leave to Shravanabalagula

13 00 hrs Lunch

14 00 hrs Visit Shravanabelagola.

This place is famous for the Bahubali Statue which is supposed to be the tallest monolithic stone statue in the world with a height of 58 feet carved out of a single block of granite. The Gomateswara temple is built on top of a hill at an altitude of 3347 feet, called as Vindhyagiri hill (also known as Doddabetta or Indragiri). About 620 steps provide access to this temple from bottom of the hill. The nude statue of Bahubali is carved carefully with much perfection.

16 00 hrs Leave to Hasan and Halt

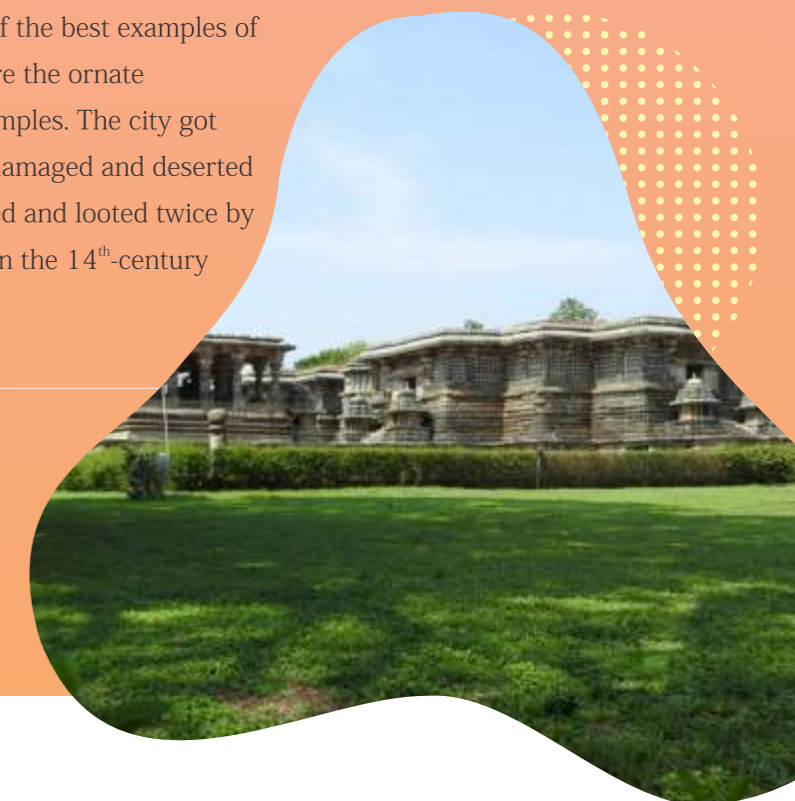

08 00 hrs Visit the Chennakeshava Temple

The temple is a 12<sup>th</sup>-century Hindu temple, which was commissioned by King Vishnuvardhana in 1117 CE, on the banks of the Yagachi River in Belur, an early Hoysala Empire capital. The temple was built over three generations and took 103 years to finish. It was repeatedly damaged and plundered during wars, repeatedly rebuilt and repaired over its history.

10 00 hrs Visit Halebeidu

Halebeidu was the regal capital of the Hoysala Empire in the 12<sup>th</sup> century. It is home to some of the best examples of Hoysala architecture. Most notable are the ornate Hoysaleshwara and Kedareshwara temples. The city got the name "Halebidu" because it was damaged and deserted into "old capital" after being ransacked and looted twice by Islamic forces of the Delhi Sultanate in the 14<sup>th</sup>-century Temple

12 30 hrs Lunch in Hasan

13 30 hrs Leave to Bangalore

17 30 hrs Arrive Bangalore Airport

## TOUR COST

**US \$ 250/- per person.**

The cost includes one day accommodation, transport by AC mini Bus/Car, food charges, entry fee, guide charges, and other miscellaneous expenses.

Interested delegates may confirm their option of tour before 31<sup>st</sup> January, 2019 to the Co-ordinator, APSERI-2019 (e-mail address and telephone numbers are already given) by remitting the cost to the Bank A/c details already given.

# Sample Abstract

## DOES YELLOW SUBSTANCE IN SERICIN CORRELATE WITH ANTIOXIDANT ACTIVITY?

Vallaya Sutthikhum<sup>a</sup>, Wilaiporn Rathin<sup>a</sup>, Prachachart Nottaseny<sup>b</sup>, Reon Somana<sup>c</sup>

<sup>a</sup>Department of Chemistry, Faculty of Science, Maharakham University, Maharakham province, 44150 Thailand

<sup>b</sup>Queen Srikit Sericulture Center (Roi-et), Thawatburi, Roi-et province, 45170 Thailand

<sup>c</sup>Department of Biology, Faculty of Science and Palaeontological Research and Education Centre, Faculty of Science, Maharakham University, Maharakham province, 44150 Thailand

Domestic (*Bombyx mori*) polyvoltine yellow cocoons (NN, SR, NLI and KK race) and bivoltine white cocoons (WW) as well as the wild Eri silk cocoons (*Philosamia Cynthia ricini*) were degummed with hot water to get crude sericin extract. The determination of antioxidant activity in such extracts by DPPH assay revealed that Eri silk cocoon was with the highest antioxidant activity ( $IC_{50} = 0.17 \text{ mg/ml}$ ) followed by the yellow cocoons ( $IC_{50} = 0.35\text{-}0.61 \text{ mg/ml}$ ) and the white cocoons of *B. mori* ( $IC_{50} = 1.1 \text{ mg/ml}$ ), respectively. The sericin fractionation of *B. mori* white and Eri silk cocoon with 5, 70 and 90%  $(NH_4)_2SO_4$  yielded the white protein precipitate in all fractions whereas the precipitate from *B. mori* yellow cocoons salting-out with 50%  $(NH_4)_2SO_4$  was yellow but that with 70 and 90%  $(NH_4)_2SO_4$  was white. The DPPH assay for all protein fractions demonstrated that the white proteins fractionated by 70%  $(NH_4)_2SO_4$  from all types of silk cocoons possessed very high antioxidant activity, and the highest was that from Eri silk cocoons. However, the lowest activity was found in that from the deepest yellow KK cocoons. The results suggest that not yellow substances in *B. mori* silk cocoons but white proteins extracted from sericin fraction of cocoons should play the major role in exhibiting antioxidant activity.

(Note: NN, Nang-noi; SR, Srisaket; NLI, Nang-lai; KK, Kaki)

Keywords: *Bombyx mori*, *Philosamia Cynthia ricini*, sericin, antioxidant activity
